TDS of Methyl High Hydrogen silicone oil IOTA202

Structure:

Typical Properties

Test	Unit	Value
Hydrogen content	%≥	1.55
Viscosity	25°C, mm ² /s	15.00 ~ 40.00
Refractive index	°C	1.390 ~ 1.410
Density	25°C, g/cm ³	0.995 ~ 1.015
Volatile matter	%≤	1.00 ~ 4.00

Properties and Uses:

1. Under the function of metal salt catalysts, it can form film at low temperature, form waterproof membrane on all kinds of material surface, thus it can be used as the waterproofing agent of various kinds of materials such as rubber, fabric, glass, ceramic, paper, leather, metal, cement, marble, etc.
2. Used in silicone rubber processing and other high-end products;
3. Used for general textile auxiliary/powder processing;
4. Widely used for the synthesis processing of building materials (ceramic antifouling agent) .

5. Methyl Hydrogen silicone oil emulsion can work with methyl hydroxy silicone oil emulsion, offer waterproof function and can keep the permeability of fabrics, and can improve the tear strength, friction strength and soil resistance, improve the touch and sewing performance.

6. It can be used as anti-stick isolation agent and crosslinking agent of paper

Package, storage and transportation:

1. 200L Plastic coated metal pail or plastic drum (Net W.T. 200KG/drum).

2. Keep in cool and well ventilated place. Far away from fire, heat source. Storage temperature < 30°C, sealed tightly, no mix with anti-oxidant, acid and edible chemical materials.

3. The lighting, ventilation facilities in the storage room should adopt explosion-proof products.

4. Load gently, Prevent packaging and container from damage,

5. Non- Hazardous chemicals
